2. *Select **Quick Setup Wizard**.*
3. The self-explanatory wizard will guide you through the installation procedure. Follow the on-screen instruction to proceed.

## STEP 3: CHECKING THE INTERNET CONNECTION

You can open a new web browser to surf the Internet now.
Should the access fail, you can check by the following steps:

3-1. go to 192.168.1.254;
3-2. select **Network status\WAN IP Status** in the left pane,
3-3. if the IP address field displays anything except 0.0.0.0, it means the Internet connection is well established. Otherwise (as illustrated below), repeat the whole procedures.
